

Architectural Metal Work at its Best

Euroscroll Engineering was established in 1992 and has since evolved into major manufacturers and installers of Bespoke Architectural Metalwork's.

Our team of highly skilled and dedicated workforce will project manage a contract from onset in design right through to installation and close, strictly following our quality management system.

We pride ourselves in producing timeless and contemporary designs along with period pieces by combining traditional black smith methods with the latest advanced processing equipment.

We specialise in using Mild steel, Stainless steel, Aluminium and Bronze.

Our product list includes items such as Gates, Rails, Balconies, Staircases, Handrails, Driveway Lights, Letter Boxes and Pillars.

We also have made unique pieces for the home interior Beds, Stair balustrade's and Lights.

This Brochure is a small sample of some of our work.

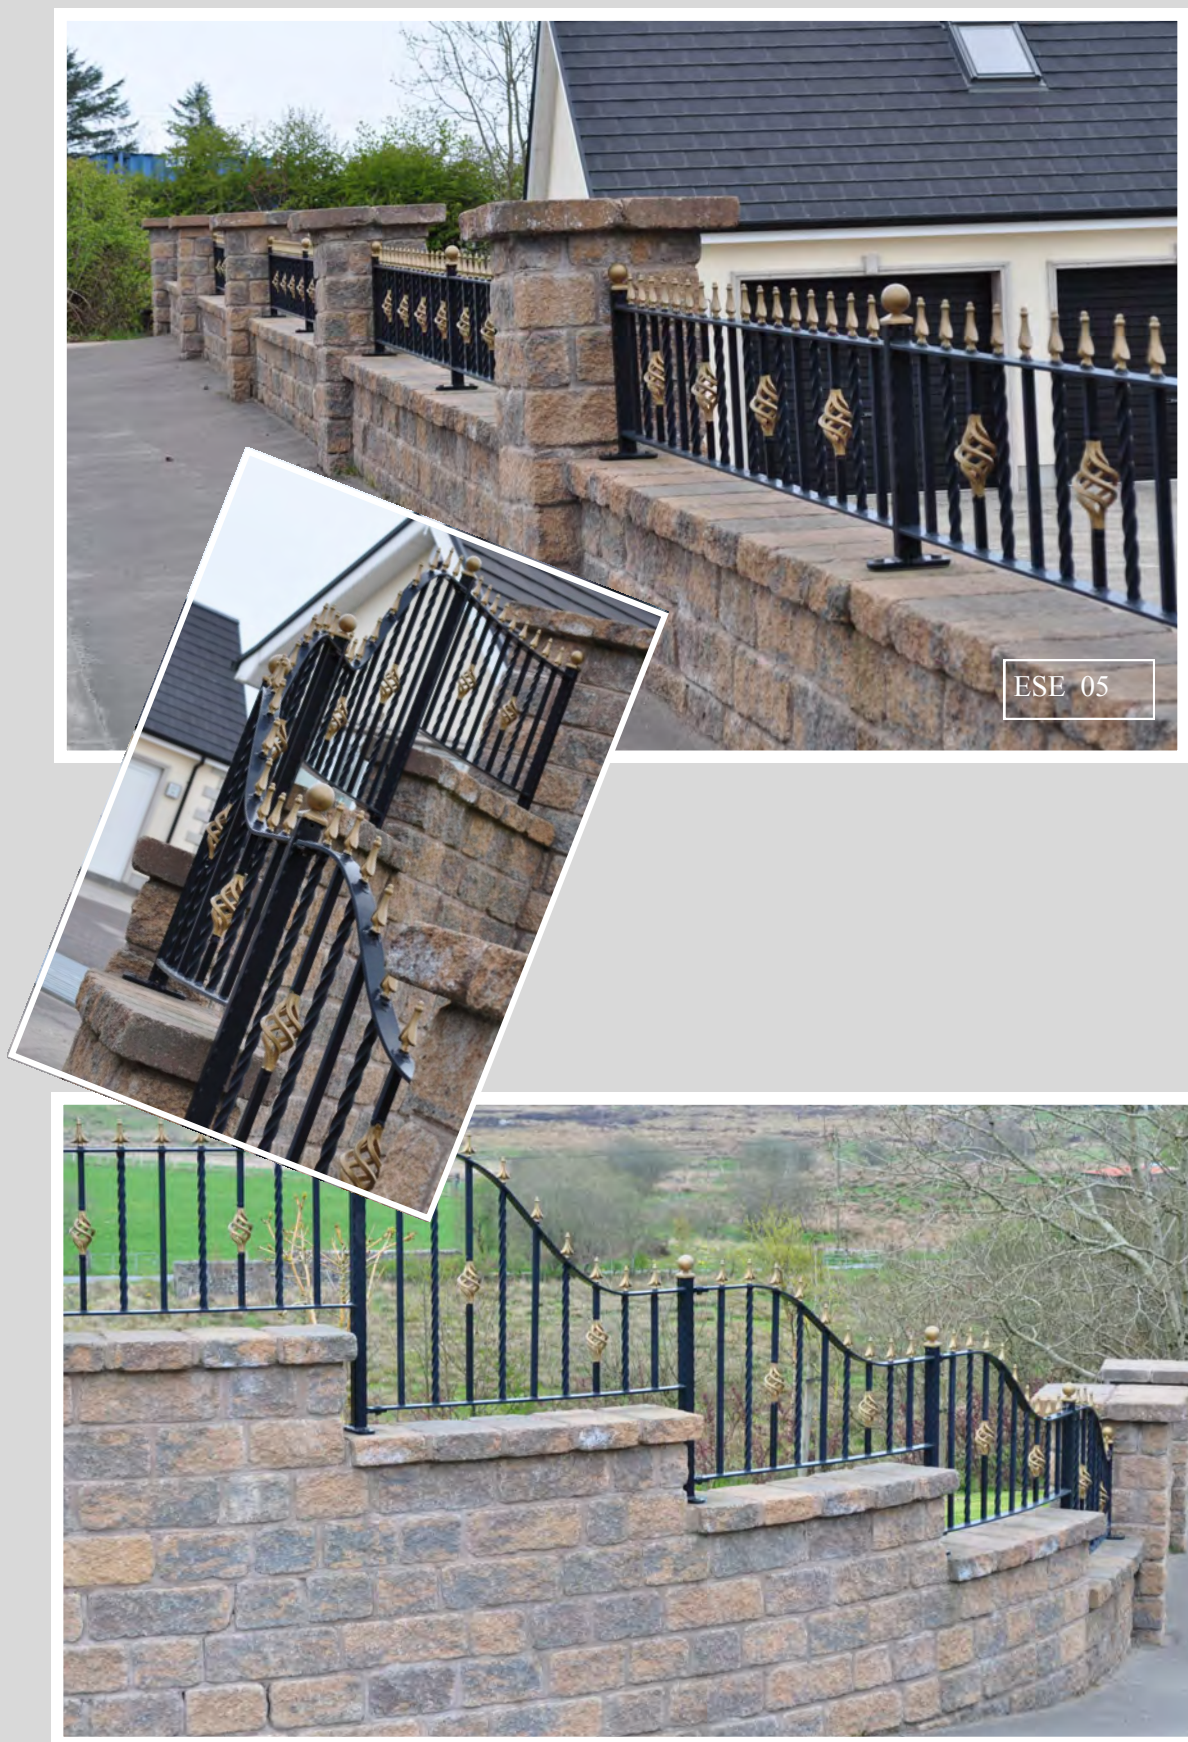

ESE when quality matters

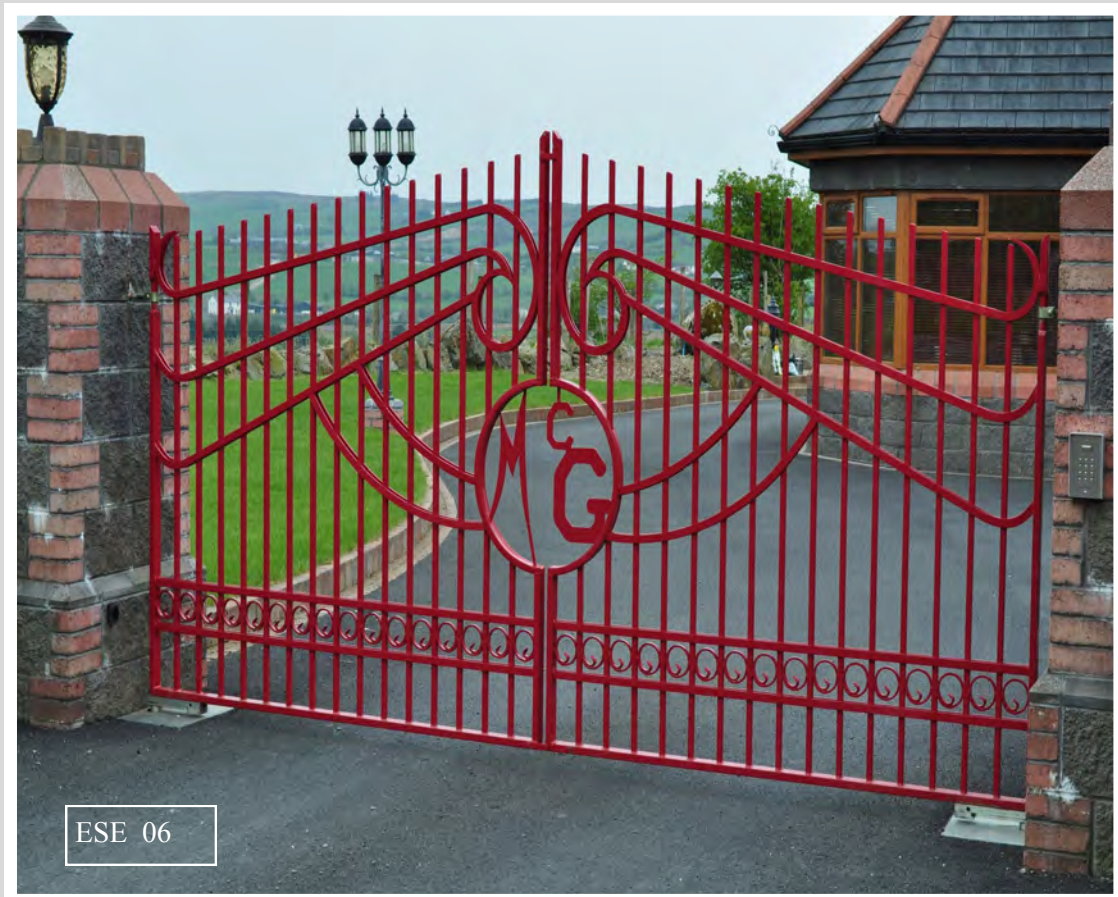

We supply the complete range of security entry systems. Intercoms, Keypads, Camera's, Underground systems & Sliding Systems.

Lattice Pillars

Gothic Pillars

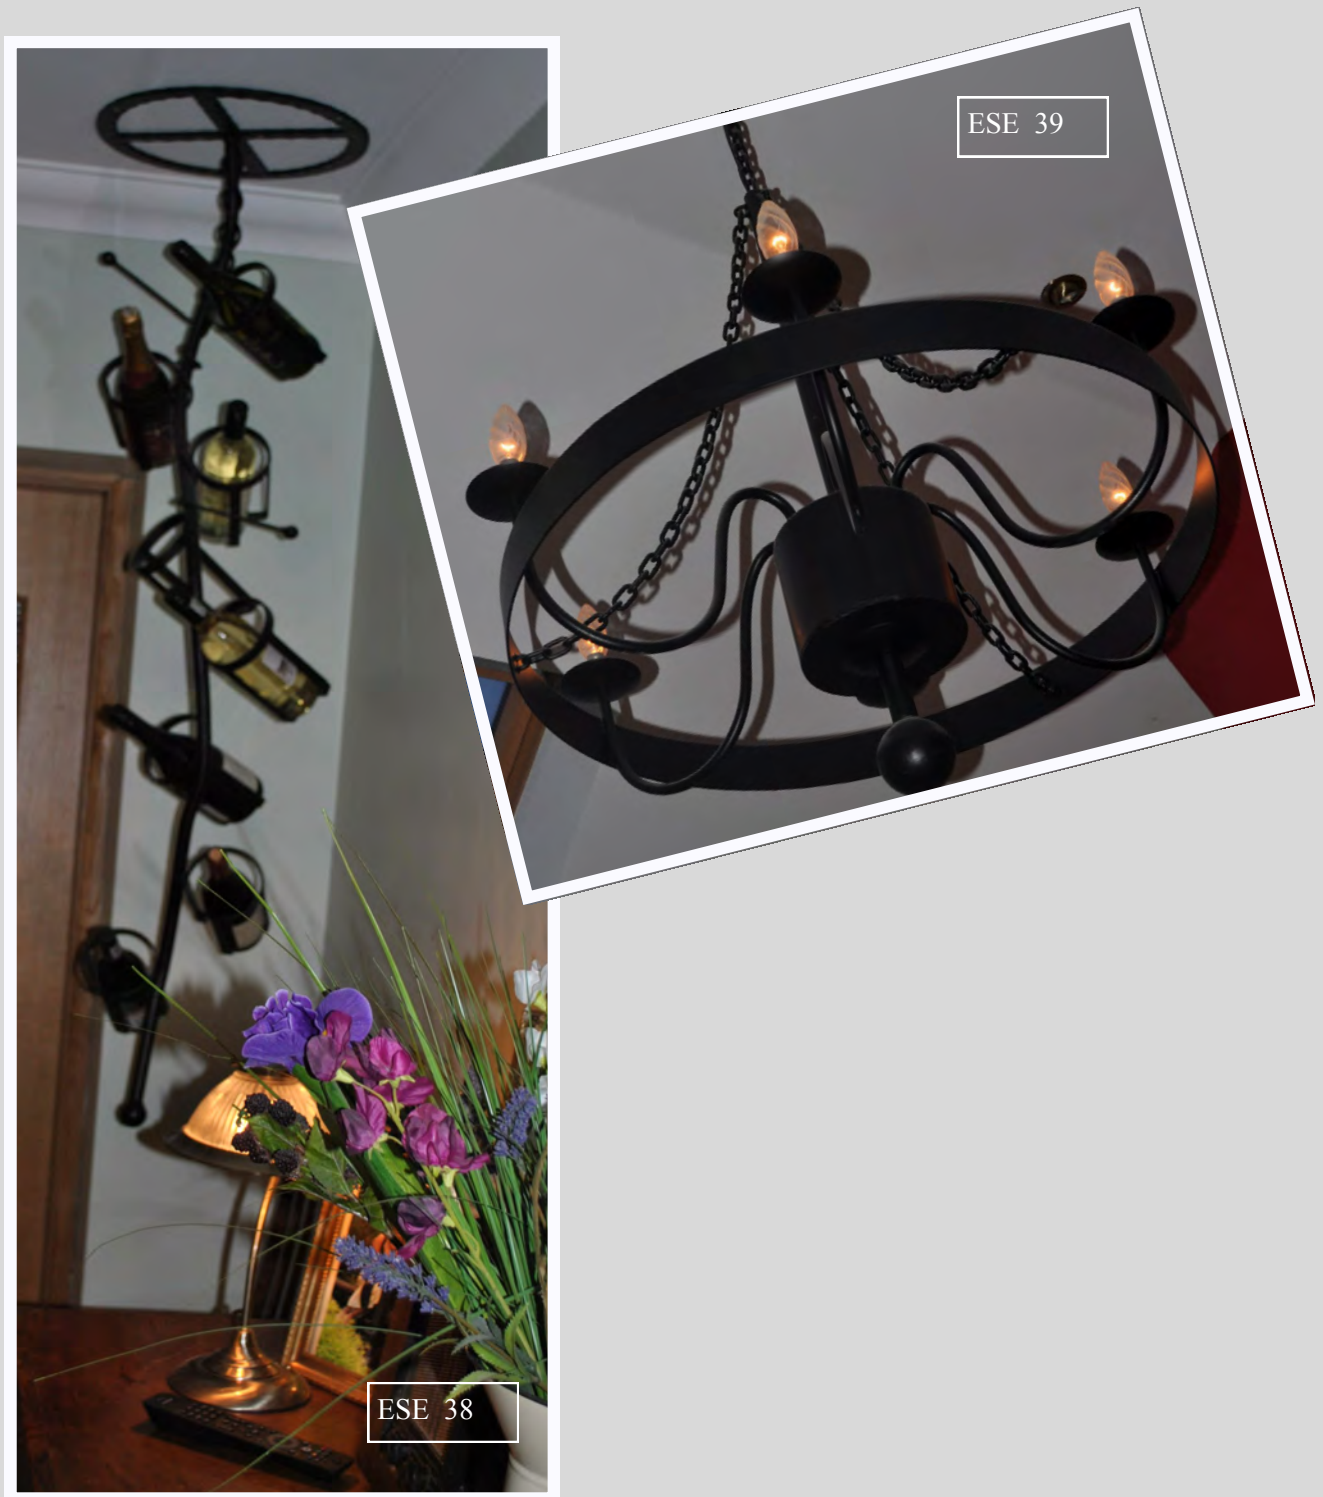

PILLARS

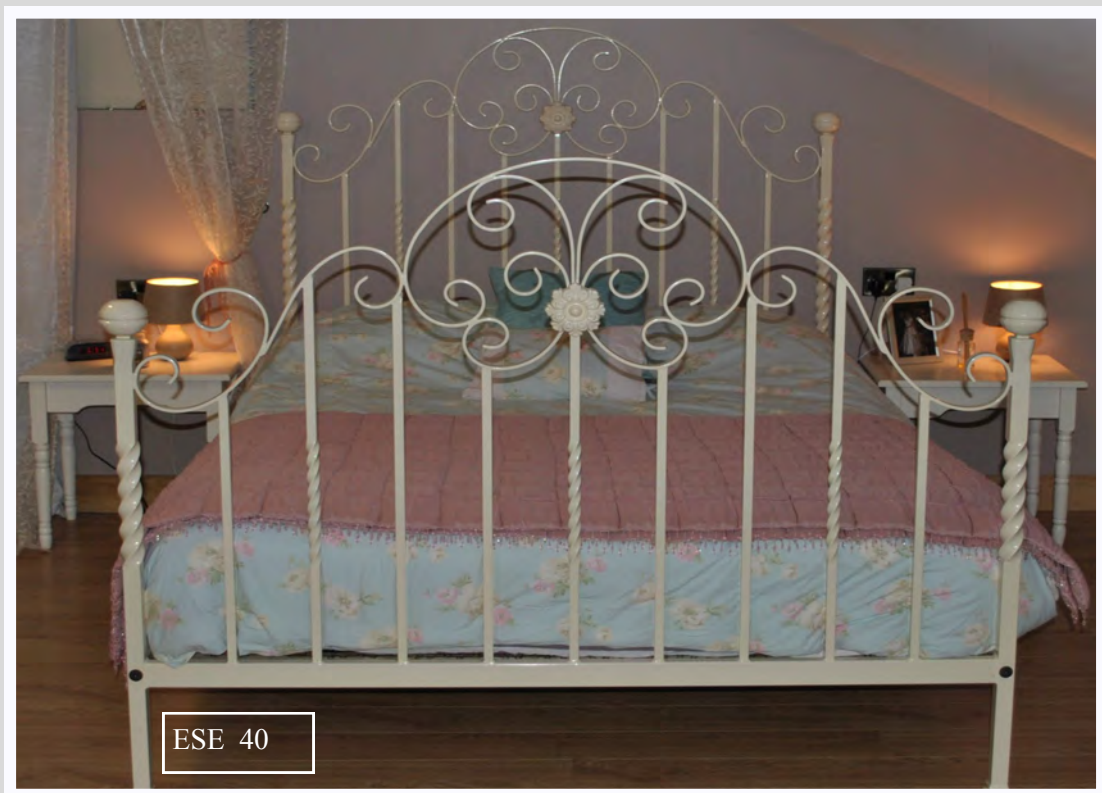

We can offer an unusual and attractive alternative to brick pillars, We have custom designed three stunning pillar options. These substantial structures are capable of carrying the weight of our heaviest gates, but retaining a light, elegant appearance.

On show at our premises

Textured Pillars

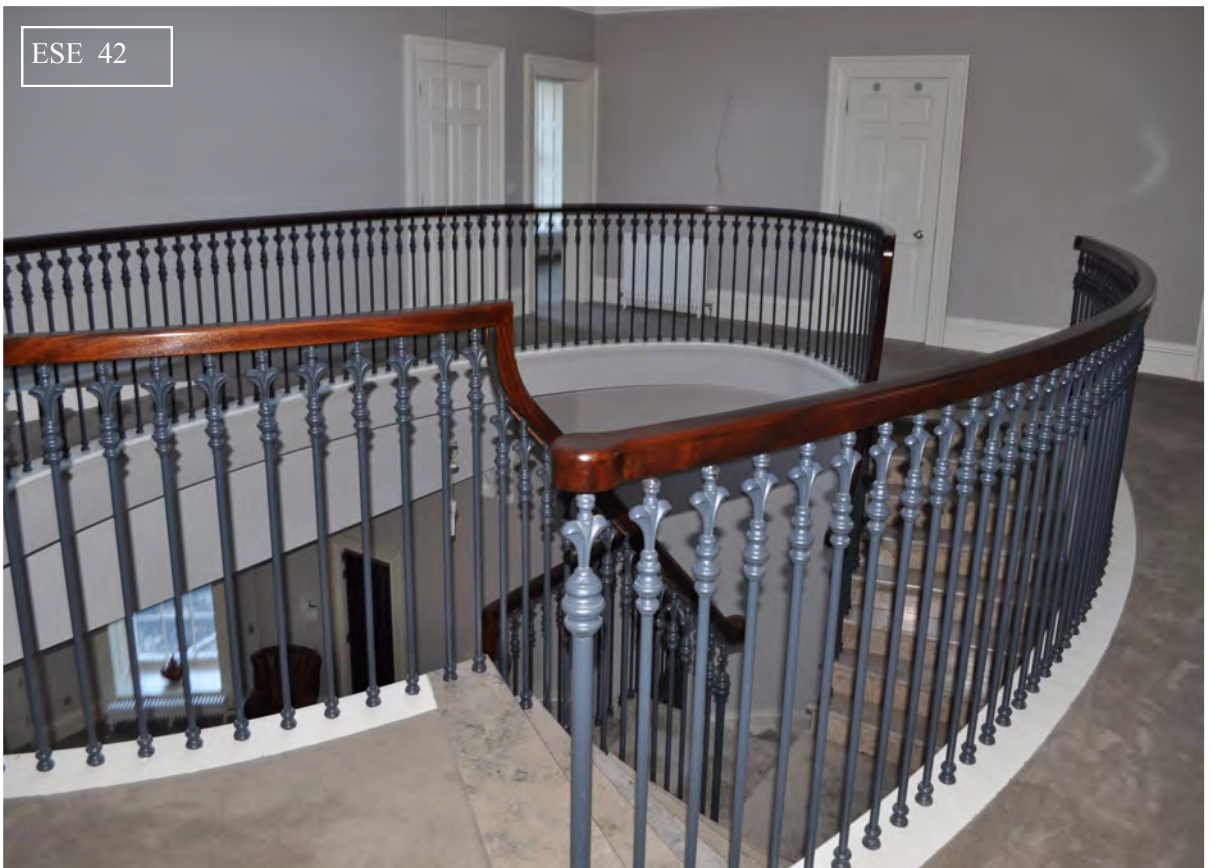

We also Pride ourselves with creating unique pieces for the home
